This newly updated edition contains essential information families need during this difficult time. It includes descriptions of the newest treatments, such as computer-assisted surgery, stem cell transplants, and targeted therapies as well as practical advice about how to cope with diagnosis, medical procedures, hospitalization, school, and finances. Effective ways to form a partnership with the medical team are provided, as are resources for medical information, emotional support, and financial assistance. The poignant and practical stories from more than 100 children with brain or spinal cord tumors and their parents show the personal side of diagnosis and treatment.
