Customer Reviews

Like another reviewer, I never knew SQUAT about the table when first encountering John Patrick's INCREASED GENIUS concerning this wonderful game. His style of "telling it EXACTLY like it is" upsets MANY who feel they have "just arrived" and Vegas had better watch out for their expertise. However, HIS is, by far, the more realistic. In observing the BEGINNERS at a CRAPS table, I see them, constantly, betting the Pass line REGARDLESS of the trend of the table to "seven out" every other toss of the dice - John comments on these "dorks" and it upsets them. They, then, try to transfer THEIR lack of expertise at the table to his blame with such inane comments as "That must be why he writes books - in order to compensate for his losses". In California casinos, the math, apparently, isn't the same as covered in this SUPERB instructional book; because some actually believe [because they know no better] and comment that the Come bet is so much better than the Place bet. Just a simple point that John brings out [and backs up] is that the Come bettor must receive the "6" for example, TWICE before he collects a cent. The Place bettor needs that 6 to hit, only, once. Any mention of 6/5 [come] opposed to 7/6 [place] doesn't build your winnings as much as listening to the advice in this book and it is grossly faulty in its math. First, for every Come bet, as

soon as the 6 would hit, you'd be paid [one-to-one for the basic bet and true odds ONLY on the odds you've taken] and you'd have to go through the Come again to get back to that 6 - meaning two more times a 6 hits for you to collect ANYTHING. Yet, the Place bet just sits there collecting each time that the "Come bettors" are playing around with that Come space.
