Gardening With Shade: Ideas For Planning And Planting

Synopsis

Book

Book Information

Paperback: 112 pages

Publisher: Sunset Publishing Corporation (February 1996)

Language: English

ISBN-10: 0376038462

ISBN-13: 978-0376038463

Product Dimensions: 10.8 x 8.3 x 0.2 inches

Shipping Weight: 12 ounces

Average Customer Review: 4.5 out of 5 stars [See all reviews](#) (4 customer reviews)

Best Sellers Rank: #806,425 in Books (See Top 100 in Books) #33 in [Books > Crafts, Hobbies & Home > Gardening & Landscape Design > Shade](#)

Customer Reviews

An excellent book that covers the different types of shade plants needed to get you started in shade gardening. Plant pictures and layouts were inspiring. Zone information and other plant information was more than adequate. I found plants to use that local nurseries hadn't even heard about. The end result is a beautiful shade garden that keeps getting larger each year.

This book gives you great ideas on what to plant and excellent examples of various shade landscaping ideas. Shade gardening is a bit more challenging because there are simply much fewer varieties of common nursery plants, less choice of color, etc. This book certainly goes a long way in helping the shade gardener in making the right decisions.

This was helpful. The index of plants that work in shade were good. Lots of pictures, little words-judge for yourself if that will work for you.

I have trusted Sunset books for many years. "Shade" doesn't disappoint. In the introduction there is a discussion of the various kinds of shade: light/partial shade, dappled shade, seasonal shade, and deep shade. Each plant discussed is flagged in the heading as to which shade types it likes. There are almost 100 different plants discussed, including their growth habits, water and light requirements, temperature requirements, and any special features such as flowers or distinctive

leaves. The pictures are, as usual, gorgeous. Ideas for plantings as interesting and inspiring. My one gripe is which type of soil the plant needs is not in the heading. Several of the discussions carry this information, but not all. Living where neither the sun nor the soil (limestone) is benign, it is imperative I purchase plants that can handle my climate.
