Customer Reviews

Duncan/Prasse's *Veterinary Laboratory Medicine* book offers an easy to understand flow of laboratory changes in domestic animals, with an emphasis on their differences (cat, dog, horse, cattle). Their sections on systems (urinary, digestive system, liver, muscle, endocrine) are very helpful in organizing thought processes. There are also 28 cases in the back of the book to reinforce the learning objectives. Highly recommended for the student

It has lines highlighted. But I can still read it. Pretty cheap so that's great. Not a bad read really

great book
