Customer Reviews

Great for practice, but be aware, this is a workbook with NO ANSWER KEY. Although I'm a teacher, I still like the convenience of an answer key.

This book is designed to reteach material learned in the classroom. It is not usually used by the teachers because they have so many other resources in their math kit. I would recommend it for tutoring or helping a child with math at home.

wonderful book. very helpful. Bought it as a back up to review so I can explain the problems she may not get in the classroom. Everyone should have an extra at home for those intense stressed days

Envision math is my favorite math program out there. I've used it for 3rd grade and 5th. I love sending it home for homework because those who need to be enriched can have the enrich page, those that need plan practice can have that and lastly those who need reteach will have less

problems but an example up at the top (this helps parents too).

Great book for reteaching and practicing concepts!

Arrived quickly. It was a bit mangled but is still usable and fine for math practice at home.
