

Synopsis

The health care industry is moving toward a major change in the code set, or "language," used to report the reasons why a physician or health care professional provided care to a patient. Since 1978, the ICD-9-CM code set has been used to report these diagnoses. Within the next few years, the code set will be changing to ICD-10-CM. While there are many similarities, there are changes that those in the health information management profession (and those getting ready to enter this profession) must know and understand. With the use of color-coded text, this QuickStudy® guide helps make the transition easier to understand and simpler to incorporate into work behaviors.

Customer Reviews

This is just the right size to carry to work. I am studying the ICD 10 now and I can take this out and read over it at work. The other staff want to use it over their breaks. I have no fear of giving it to them because I know that they can spill coffee on it or anything else.

I am currently attending Seminole State College Of Florida. And Yes you can get a good education at community college without breaking the bank. Anyway, this chart breaks down the coding concepts into the simple terms so that students can apply what they read from the textbook and their professors.

Its a EXCELLENT resource to understand the changes and difference between ICD-9 & ICD-10. Clear and precise at all!!!! BUY IT,

I wanted something that I can study from. I just love this study guide, and it's not bulky. Great information too. I want to be ready for Icd-10. thanks.

I have found this quick study guide helpful in trying to memorize for my medical coding classes. Plus it's very concise. Perfect but if you plan on taking the testing for certification, they will not let you take this with. Just good to have for practice.

This was OK and for the most part it is a good tool. It's very condensed and difficult to read at times---of course it could be my old eyes.

The study guide is nice and sturdy - laminated and quick folding. Good desk reference for ICD-9 & ICD-10. Good choice for assisting with the conversion from ICD-9 to ICD.

If you are just starting out in the medical industry then it will be of some help, but if you have done this for 10 years like I have it wasn't new information.
