Field Guide To The Eyes (Field Guide Series)

Synopsis

This book is structured primarily by the presenting problem to facilitate access by the non-specialist. It includes an introductory chapter on the screening examination with the presentation of each problem being structured in a "what to do" and "how-to" format. Topics covered include eyelid, lacrimal, and orbital abnormalities, red eye, iris, lens, retina, and more.

Customer Reviews

I am a student Family Nurse Practitioner this book was part of our recommended readings. Its a great reference for nurses who aren't familiar with eye problems. I'm sure I will use it as a reference in my practice.

Quick concise guide for variety of eye emergencies and non emergencies. Great pictures! I use this quite frequently in the emergency room. Not alot of detailed information, gives common presentation and treatments for each disorder.
