Evaluation Of Human Work, 2nd Edition

Synopsis

Comprising a compendium of ergonomics methods and techniques, this text covers every aspect of human work. This edition provides a reworking of existing chapters on the framework and context of methodology, the observation of performance, task analysis, experimental and study design, data collection, product assessment, environmental assessments, measurement of work and the evaluation of work systems. New chapters cover topics including: the human-computer interface; computer-aided design; work stress; psychophysiological function; risk evaluation; fieldwork; and participatory work design.

Book Information

Paperback: 1152 pages
