# Pharmacology For Health Professionals

## Synopsis

This text is designed for a one-semester course for health professions students who will not administer drugs but need a foundation in pharmacology. Organized by body system, the text explains the basics of clinical pharmacology and the actions, indications, contraindications, adverse effects, and interactions of drug classes. Full-color illustrations highlight and explain important concepts and techniques. Information on specific drugs is presented in bulleted lists, boxes, and tables. Chapters include key terms, key points, Website activities, case studies, review questions, and critical thinking exercises based on real-life patient care situations. A bonus CD-ROM contains additional learning activities. An Instructor's Manual with CD-ROM includes a test generator and PowerPoint slides.

## Book Information

Paperback: 596 pages

Publisher: LWW; 1 edition (February 22, 2005)

Language: English

ISBN-10: 0781752841

ISBN-13: 978-0781752848

Product Dimensions: 10.9 x 8.4 x 0.8 inches

Shipping Weight: 3 pounds

Average Customer Review: 2.5 out of 5 stars [See all reviews](#) (2 customer reviews)

## Customer Reviews

This book is an appallingly dull magazine article with each chapter a dull repetition of drug names, uses, contraindications, adverse effects. Written as though by a drug industry shill, the book condescends to include some information on herbal remedies but undercuts almost every one with vague warnings and statements that "research" shows this to be ineffective for... but then OMITTS the research citation. Interestingly, in the chapter which includes discussion of malarial drugs, the book omits any mention whatever of the herb "Artemisia" (qing hao is the Chinese name) which DOES work against malaria and has been certified by the World Health Organization for that purpose. At every step, the most horrible side effects of the pharmaceuticals are dismissed with a

wave of the hand as if it is OK that some drugs produce as side effects the very illnesses that they are supposed to be curing. Avoid this dull dumbed down long winded "advertising" brochure and try to find SOME OTHER book on pharmacology. Katzung is pretty good.

I recieved this book and it was stuffed in an everyday USPS envelope/cardboard! There was no plastic around it. There was no bubble wrap. As much as I paid for shipping you thing they would at least package it nice. Also the corner of the book was bent from all the man handling from the USPS or Vendor. The book was overall in good condition. It didn't looked used but I had to question it for a min. because of the package. This book is boring lol but that has nothing to do with the company that sold it to me. Four out of 5 stars.
