Did you know that "Mork and Mindy" was a spinoff from the hit TV show "Happy Days". While Mork only appeared in one episode, that was enough to make it a hit. Sometimes spinoffs are great. "Mork and Mindy" was hilarious. Then you have other spinoffs that are pale imitations of the original. Does anyone remember Joanie Loves Chachi? Probably not. Windows Vista for Starters is a spin-off from the highly respected "Missing Manual" series. Unfortunately, it's more of a "Joanie Loves Chachi" of the computer book world. Skip this spinoff book and head straight for the original : "Windows Vista, The Missing Manual. First off, there was an extremely funny error that hopefully will be corrected later on. On page 11 in the book, under "Mouse and Keyboard Essentials" you find the opening statement of "This book gives you three kinds of instructions that require you to use the Mac's Mouse." Unfortunately, this was an early warning sign about the quality of the book (though "Windows Vista the Missing Manua"l has another funny Mac reference). The most annoying problem with the book is the spacing of screen shots and their explanations. Most of the time, I found the screen shot a page before an explanation which made it extremely difficult to read the explanation and see what is being talked about because I had to flip pages back and forth. While it was a welcome breeze to have that page flipping, it was a waste of time and a example of poor editing. In addition, while the Missing Manual clearly states which version of Vista has which features, this book gave no such indication as to whether the feature being explained would work in a particular version of Vista.
