## Customer Reviews

This study prep book is by far the gold standard compared to other companies such as Kaplan, Barron's, and The Princeton Review for the New SAT. The lessons are super straightforward and easy to follow. Love the tips and tricks they have! Also, I really appreciate the awesome paper quality. I can actually see the text, what's underlining, and my paper doesn't rip when erasing. The problem sets for the math section are great practice and they give great explanations on how to solve the problems. The massive amounts of practice problems are a plus. The book provides a bunch of strategies on how to solve the problems quickly and easily using as little math as possible. The reading strategies helped me get through the readings faster leaving me more time to review my answers. The grammar strategies really helped clarify some of the more difficult topics that I had trouble with. Taking all their practice tests definitely improved my confidence. Honestly, I would recommend this book to anybody. Buy this book you won't regret it!

This SAT Study Guide is awesome!! I bought this guide for my nephew who is entering into his senior year and the progress is amazing! Another reason I recommend this guide is because it is very up-to-date! It goes over all new standards and covers all major test topics!

As a tutor, I have found this book to be the best I've used for the New SAT prep. The lessons are comprehensive and easy to understand and the 6 tests are well-written. Great practice for the new test. I appreciate this quality of writing; it's a big help for my students.

I took the old SAT and was really unhappy with my score, so I had no choice but to take the new SAT which meant having to study all over again. After reading questionable reviews on the College Board's study guide, I decided to look elsewhere. I bought this book at a local test prep center. I couldn't afford classes, so I hoped this book would suffice. I'm really bad at math, so I needed a lot of practice. This book has 6 tests which is awesome because I need all the help I can get. I feel like I'm understanding the concepts of the SAT a lot better as I study. My score steadily improves with each practice test (there's a score calculation chart on page 319 to give you an idea of what actual score might be). I feel a lot more confident about having to take the SAT again because this book

helped me understand the concepts really well.

I originally bought the College Board book, but I was disappointed to find that all of the tests can be found for free online. This book caught my eye because I saw it had 6 tests; that's two more than the College Board book. When I sat down and did the tests, I found that the English sections were pretty straightforward, and the Math had some pretty tough questions; I might need a tutor! I also liked that this book had its own scoring chart, so I can see how much I'm improving as I go through the tests. The lessons are also filled with plenty of material, even better than Princeton Review's.
