Synopsis

Fecal Microbiota Transplant (FMT) studies report that this innovative procedure has a 90% cure rate for *Clostridium difficile* infections. In addition, FMT holds tremendous promise for a host of digestive and autoimmune system disorders, such as Crohn's, Ulcerative Colitis, Microscopic Colitis, IBS, Autism, Multiple Sclerosis, Parkinson's, Chronic Fatigue and more. Every week research is unveiling new answers and possible solutions to many chronic conditions by utilizing this ancient treatment. As an administrator for a fecal transplant discussion group of almost 4000 members, T.A. Buhr has been an advocate for the procedure. In addition to some of the latest research, this book also contains a how-to guide for those doing it at home, as well as the tips, tricks and wisdoms learned from the experiences of this discussion group. T.A. Buhr also brings her own experiences with FMT. The procedure put her Microscopic Colitis into remission and vastly improved her immune function.
