The Sculptor In The Sky

Synopsis

You can not have a life, you can not lose a life . . . You are life. It is you who hold the power to decide yourself back onto the path you intended . . . the path of welcoming and becoming your own bliss. The Sculptor In The Sky, the new book by spiritual catalyst, Teal Scott takes you on a journey of rediscovery of the universe of god and of yourself. This extraordinary book challenges us to reconnect with the eternal essence of our being and to expand our ideas about the reality we live in. It is a must have for the curious, the wanting and the ready. A provocative guide to answering the questions that every person asks at some point in their life.

Customer Reviews

I will usually read a book in segment of spirituality every now and then when I get way out of balance. As it goes, book will find a way to it's readers. The Sculptor in the Sky was no exception. It attracted me at the right time and brought me back to the simple knowledge, somehow forgotten. The magic is in the way text is constructed. It is channeled, no doubt about it, but the trick is in receiver. Every person will transfer the knowledge in a different way. And this is good - that's why some people will prefer one author to the other, even though they may be writing on the same subject and basically giving out the same information. Teal however manages to channel this text in physical form with lots of layers (using not only structure but very rich vocabulary as well), so book will literally 'work' on you as you read it. As your intention gets driven between the words the space within opens for higher understanding. So as any really good book, this one too can be read numerous times. I find it really good and practical with tons of useful information that can help you

understand things outside, centering you back inside :) Anyway, I would warmly recommend it to everybody - young, old, 'spiritually advanced', or someone who doesn't know what word 'spiritual' represents, or even hate thinking of any concept behind so called material reality. But again, if you are reading this or any other review, do not buy it only because someone recommends it. Stand back, go within your space and ask: "is this book right for me now". After that, you only need to act :)
ps Search YouTube for Teal Scott (the spiritual catalyst) to enjoy some of her teaching from the first hand..

First, I must thank the author for this book. To call the content of this book deep is an understatement. When I received the book I thought it would be a quick read --around 150 pages. It was anything but a quick read for me. Every couple pages I would find a sentence or paragraph so profound it lead me to reread it and pause to ponder the impact of that truth on my own life. Some of those pauses would last hours or more! I still find myself going back and rereading sections of this book to further think through. I have also found her website and youtube videos extremely insightful. Both are freely offered and are not a sales pitch for expensive self help packages. I get the feeling if she could afford a simple life without selling the book, it too would be free. Thank you Teal for sharing this book with the world! It is the best book I've read on my search for meaning.

Very pleasantly surprised by the maturity of this author. Among the spiritual books which I've read over the past 30 years, this is among the rare which shifted my awareness. This book is unique even among those in that it gives 'operational' guidance; it provides pragmatic and logical approach to everyday life situations.

I found my way to Teal Scott's YouTube page several months ago, and have since begun a spiritual journey that I never thought would take place. The book was the final piece in a puzzle I had been searching for, the piece that helps you realize you are meant to be here, you are meant to be loved, to love, and if you choose not to do any of the above that's okay too. My path to releasing resistance is entirely in thanks to Teal, opening my mind and heart to so much new information. The most incredible thing is reading through the book, feeling so many truths resonate within my core in a way that it's more like recalling a memory than learning new information. I love Teal for all that she does and her incredible power to raising the frequency of the world, and most incredibly she's taught me to love myself, trust myself, and feel deserving in myself more and more each day.

If you have any doubts about Teal being "the real thing" just watch her during one of her synchronization workshops. She Answers each query with humour and wisdom in a way than can't help but empower the person asking. This book does that as well. It is my belief that we all "know" the universal truths that Teal talks about in her book, but have become so enthralled with the "material world" we all but forgot our unlimited heritage. This book will remind you that life is a grand adventure that you choose. Reading it renewed my enthusiasm for life -recharged my batteries as it will yours. Thank you Teal. The Sculptor In The Sky

This is what it is! I could not have resonated more with this book. The author is simply amazing. Her knowledge and insight is nothing short of an incredible connection to Source. I never read books more than once, but I most certainly will read this again and again to keep reminding me of who I am.

I'm SI blessed to have found this book. It I truly a gift. Do yourself a huge favor and read it! There wasn't one statement in this book that I didn't agree with. I'm reading again now.

Just finished it, & about to read it again. Not a big book, but crammed with info. A lot to take in, but very good stuff- "enlightening" for lack of a better word.
