Innovations In Satellite Communication And Satellite Technology

Synopsis

Surveys key advances in commercial satellite communications and what might be the implications and/or opportunities for end-users and service providers in utilizing the latest fast-evolving innovations in this field. This book explores the evolving technical options and opportunities of satellite networks. Designed to be a self-contained reference, the book includes background technical material in an introductory chapter that will serve as a primer to satellite communications. The text discusses advances in modulation techniques, such as DBV-S2 extensions (DVS-S2X); spotbeam-based geosynchronous and medium earth orbit High Throughput Satellite (HTS) technologies and Internet applications; enhanced mobility services with aeronautical and maritime applications; Machine to Machine (M2M) satellite applications; emerging ultra HD technologies; and electric propulsion. The author surveys the latest innovations and service strategies and the resulting implications, which involves:

- Discussing advances in modulation techniques and HTS spotbeam technologies
- Surveying emerging high speed aeronautical mobility services and maritime and other terrestrial mobility services
- Assessing M2M (machine-to-machine) applications, emerging Ultra HD video technologies and new space technology

Satellite communication is an integral part of the larger fields of commercial, television/media, government, and military communications, because of its multicast/broadcast capabilities, mobility, reliability, and global reach. High Throughput Satellites) are expected to revolutionize the field during this decade, providing very high speed, yet cost-effective, Internet access and connectivity anywhere in the world, in rural areas, in the air, and at sea. M2M connectivity, enabled by satellite communications, connects trucks on transcontinental trips, aircraft in real-time-telemetry aggregation, and mercantile ships. A comprehensive analysis of the new advances in satellite communications, *Innovations in Satellite Communications Technology* is a reference for telecommunications and satellite providers and end-users, technology investors, logistic professionals, and more.

Book Information

Hardcover: 448 pages

Publisher: Wiley; 1 edition (March 16, 2015)

Language: English

ISBN-10: 1118984056

ISBN-13: 978-1118984055

Product Dimensions: 6.4 x 1.4 x 9.5 inches

Shipping Weight: 1.9 pounds (View shipping rates and policies)

Average Customer Review: Be the first to review this item

Best Sellers Rank: #1,480,372 in Books (See Top 100 in Books) #41 in Books > Engineering & Transportation > Engineering > Telecommunications & Sensors > Satellite #292 in Books > Science & Math > Physics > Waves & Wave Mechanics #4472 in Books > Computers & Technology > Networking & Cloud Computing > Internet, Groupware, & Telecommunications
