Essentials Of Evidence-Based Academic Interventions

Synopsis

Essentials of Evidence-Based Academic Interventions puts at your fingertips the successful instructional techniques and materials necessary for accurate and effective use of evidence-based interventions. Written by Barbara Wendling and Nancy Mather, two experts in educational assessment and intervention, this intervention-oriented reference presents clear descriptions of research-based interventions in the areas of: phonological awareness and beginning reading phonics; phonics and sight word instruction; reading fluency; vocabulary and reading comprehension; spelling, handwriting, and written expression; basic math skills; and math problem-solving.

Customer Reviews

I got it for a grad class I teach on educational testing and have been using it for several years. My students report that they never return this book and find it useful themselves and in working with mainstream teachers.

Excellent book and all the research that contains makes this a very valuable resource. The CD includes also a great program to get information about the effects of language and culture in learning disabilities.

An invaluable resource for teaching children with learning difficulties as you can quickly find the

evidenced based research and bypass advertising!

Pretty good and concise. Some interventions seem out of date but will be a useful reference.
Another good book in the Essential series.

Worked for what I needed.....

This is a great reference which will come in handy when I am finally a real school psychologist! I would recommend it as an addition to your library.

This was useless to me. Was very small. I'm a very thorough person. I guess this is a quick reference guide to have if you want a quick look up but I like my textbooks to be more detailed and informative.
