Practical Management Of Skin Cancer

Synopsis

Featuring more than 200 full-color illustrations, this highly practical volume provides detailed guidelines for diagnosing and treating various skin cancers. Particular emphasis is on the more common forms of premalignant and malignant lesions, including actinic keratosis, Bowen disease, basal cell carcinoma, squamous cell carcinoma, and melanoma and its subtypes. For each type of cancer, the authors provide complete information on clinical features, pathogenesis, histopathology, diagnosis, treatment, follow-up, and prognosis. The book describes a variety of diagnostic methods, including shave biopsy and punch biopsy, and discusses all available treatments, including micrographic surgery, electrodesiccation and curettage, surgical excision, cryosurgery, intralesional therapy, and radiation. Close attention is given to surgical anatomy, proper use of surgical instruments, suturing techniques, postoperative wound care, common complications, and hazardous pitfalls

Book Information

Hardcover: 194 pages

Publisher: Lippincott Williams & Wilkins (January 1999)

Language: English

ISBN-10: 0387366385

ISBN-13: 978-0397516049

ASIN: 0397516045

Product Dimensions: 0.5 x 7.2 x 10.2 inches

Shipping Weight: 1.4 pounds

Average Customer Review: 4.3 out of 5 stars [See all reviews](#) (3 customer reviews)

Best Sellers Rank: #3,790,145 in Books (See Top 100 in Books) #18 in [Books > Health, Fitness & Dieting > Diseases & Physical Ailments > Cancer > Skin Cancer](#) #1007 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Dermatology](#) #1662 in [Books > Medical Books > Medicine > Internal Medicine > Dermatology](#)

Customer Reviews

Outstanding material, concise and to the point, a wealth of knowledge. very helpful for primary care doctors and well as all other specialties in providing a fairly in-depth review of the different types of skin cancer and their management.

Great book, I highly recommend it !

It tells you how to make the operations, some physiology about skin cancer and a lot of pictures but there is no explanation on pictures that would clarify why exactly that picture classifies as certain type of skin cancer. You have to make your own theory. I wished author put two comparable pictures together and make differential diagnosis side by side.
