This Book Warps Space And Time: Selections From The Journal Of Irreproducible Results

Synopsis

The Journal of Irreproducible Results is the funniest thing to happen to science since Archimedes ran naked through the streets of Syracuse." --DiscoverScience humor magazine The Journal of Irreproducible Results has targeted "hypocrisy, arrogance, and ostentatious sesquipedalian circumlocution" since 1955. JIR editor Norman Sperling presents humorous and quirky tidbits relating to science, math, academia, bureaucracy, and witty word play. More than 250 entries ponder and pun the practical and peculiar. Consider OSHA's definition of the word "exit" as compared to Merriam Webster's: OSHA states, "Exit is the portion of a means of egress which is separated from all other spaces of the building or structure by construction or equipment as required in this subpart to provide a protected way to travel to exit discharge." Webster's defines "exit" as, "A way out of an enclosed place or space." If you've ever questioned the warning label on your hand drill that reads, "This product is not intended for use as a dental drill," or wonder what the "punishable by law" penalty is for snipping off that warning label on your pillow or mattress, then this book is for you.

Customer Reviews

I have two previous books with article reproductions from JIR, and I have enjoyed them greatly. And I looked forward to more fun. It arrived today, and I'm disappointed. The small format, re-typing and coloring has 'destroyed' the articles. The touch of satire embedded in the scientific journal-like presentation is lost, and the contents is reduced to plain jokes. Try to get hold of the two previous volumes of 'proper' JIR articles instead!!

This book is packed with humor and advice in the form of short articles, poetry, and cartoons. Part of one page of axioms for example, lists these three: The colder the X-ray table, the more of your body is required to be on it. If it tastes good, it's trying to kill you. Eagles may soar, but weasels don't get sucked into jet engines. And here's a riddle: Do 1,000 chameleons make a chameleon? Another one: What did houseflies do before there were houses? The density of humor may be higher than you can handle, so plan on dipping into the book from time to time, when you're fresh.

This book was filled with many of the funniest and wittiest short articles and cartoons from a great science humor magazine- The Journal of Irreproducible Research.

Good idea, but not that great. Many articles, but a lot of them aren't funny. I need 5 more words

If you're a bit of a science nerd with an appetite for sarcasm, this is the book for you. Clever and funny, albeit a very light read.
