Customer Reviews

This book is an essential compendium of the writings which have most affected 20th century thought, social structures, and politics. Despite our technological advances in the 1990's, these issues have persisted over the past 2,500 years. Mark Twain said, "Thinking is some of the hardest work that you can do, which explains why so few people engage in it." This book will elicit a great deal of thinking; and, rightfully, will raise more questions than it answers. It is an essential compilation for those who wish to become familiar with these issues and for those who wish to have a reference close at hand. It belongs in every home library.

In order to understand the political context with live in today this book is essential. From Socrates to Ghandhi this book provide the most important writings of the most influential writers of Western culture for the past 2,000+ years. Whats nice about this book is that you can read it more than once and find new interpretations the second and third time through. I have created a list of quotes from the various excerpts that i plan on incorporating in my future writing.

Product arrived in excellent condition.

Great book
