This is one of the books that brought me back from the brink of agnosticism. Christianity is a worldview that is based on historical evidence and rational arguments. The Handbook of Christian Apologetics provides a firm basis for defending Christianity by offering a wide range of reasons for belief. It is aimed at both believers and non-believers alike. Its goal is to help believers defend their faith and to help non-believers see the reasonableness of believing in Christianity.Kreeft and Tacelli

write in a lively and intelligent manner. Their train of thought is fairly easy to follow, although it wouldn't hurt if the reader has a bit of knowledge of philosophical terms under her belt. The authors begin with a look at faith and reason. They note how both are vital, and that faith and reason can never contradict each other. In the following chapters they tackle topics such as, Does God Exist? (they offer 20 arguments for the existence of God), The Problem of Evil, The Divinity of Christ, Life after Death, Objective Truth, just to name a few. Each chapter is followed by a number of discussion questions to help the reader digest and cogitate on what was just read. A bibliography is provided for those who wish to delve more deeply into each of the subjects presented. The authors confine themselves to the core beliefs common to all orthodox Christians. As a result, this is a book that can be read and used by all orthodox denominations and traditions. One section I found particularly interesting was where they discuss how a person receives salvation by asking if a good pagan like Socrates could have been saved. Another good section (there's so many of them) is where they discuss free will in the chapter on evil.
