Science, Grade 3 (Interactive Notebooks)

Synopsis

Interactive Notebooks: Science for grade 3 is a fun way to teach and reinforce effective note taking for students. Students become a part of the learning process with activities about plant and animal adaptations, the human body, matter, force and motion, simple machines, the solar system, and more! This book is an essential resource that will guide you through setting up, creating, and maintaining interactive notebooks for skill retention in the classroom. High-interest and hands-on, interactive notebooks effectively engage students in learning new concepts. Students are encouraged to personalize interactive notebooks to fit their specific learning needs by creating fun, colorful pages for each topic. With this note-taking process, students will learn organization, color coding, summarizing, and other important skills while creating personalized portfolios of their individual learning that they can reference throughout the year. Spanning grades kindergarten to grade 8, the Interactive Notebooks series focuses on grade-specific math, language arts, or science skills. Aligned to meet current state standards, every 96-page book in this series offers lesson plans to keep the process focused. Reproducibles are included to create notebook pages on a variety of topics, making this series a fun, one-of-a-kind learning experience.

Grade Level: 3 and up

Customer Reviews

These were great however, it should be noted that you will have to make copies of the papers in

order for students to use them. The lesson plan and answers are on the backside. You can find other sources for about the same price on other online teacher notebooking sites. I do like that it covered thoroughly all the target concepts for 3rd grade science.

I bought this to do with my 3rd grade class. I find that these hands on activities really deepen understanding. The instructions are easy to follow and the activities aren't complicated. Great deal!

It is a very interesting book!

I love to use these for IN! It makes a concept fun for the kids and they love the cut and paste activities!

great book for interactive notebooks, working on mine this summer before the kids start school
