Customer Reviews

The lab book was labeled as in "new" condition, which was not exactly true. It had all its pages and looks nice on the outside but inside many of the lab exercises had already been done for me. I am a college student and did not appreciate that the book was already filled out. I was very disappointed to not only find that the book was labeled new when it was not but that the answers were mostly in pen so i could not get rid of them. now as a result my work looks sloppy and unprofessional. thanks a lot.

I received the book in a timely manner and it was in the condition was as stated.
