Epilepsy (Need To Know Library)

Synopsis

With our culture continually changing, young adults are faced with new issues and problems all the time. Written for reluctant readers, these titles confront issues that jump out of today's headlines. Epilepsy has been around for centuries, but there are still many myths and misunderstandings about what it is, what causes it, and what people who have epilepsy are like. The topic is especially important for young people, since 50 percent of all cases of epilepsy develop before age ten. Emanuele provides a solid introduction to epilepsy and offers teens advice on how to cope with the condition.
