Republic, Lost: Version 2.0

Synopsis

Revised and updated for the 2016 election with 75% new material. In an era when special interests funnel huge amounts of money into our government-driven by shifts in campaign-finance rules and brought to new levels by the Supreme Court in *Citizens United v. Federal Election Commission*-trust in our government has reached an all-time low. More than ever before, Americans believe that money buys results in Congress, and that business interests wield control over our legislature. With heartfelt urgency and a keen desire for righting wrongs, Harvard law professor Lawrence Lessig takes a clear-eyed look at how we arrived at this crisis: how fundamentally good people, with good intentions, have allowed our democracy to be co-opted by outside interests, and how this exploitation has become entrenched in the system. Rejecting simple labels and reductive logic-and instead using examples that resonate as powerfully on the Right as on the Left-Lessig seeks out the root causes of our situation. He plumbs the issues of campaign financing and corporate lobbying, revealing the human faces and follies that have allowed corruption to take such a foothold in our system. He puts the issues in terms that nonwonks can understand, using real-world analogies and real human stories. And ultimately he calls for widespread mobilization and a new Constitutional Convention, presenting achievable solutions for regaining control of our corrupted-but redeemable-representational system. In this way, Lessig plots a roadmap for returning our republic to its intended greatness. While America may be divided, Lessig vividly champions the idea that we can succeed if we accept that corruption is our common enemy and that we must find a way to fight against it. In *REPUBLIC, LOST*, he not only makes this need palpable and clear-he gives us the practical and intellectual tools to do something about it.

When it took Jon Stewart of The Daily Show to bring to my attention the fact that Lawrence Lessig had written a new book, I suddenly realized how apathetic I had become to the politics of the day. In his sixth book, *Republic, Lost: How Money Corrupts Congress--and a Plan to Stop It*, Lessig has examined the issue of corruption in our government and the loss of trust in our institutions and in Congress specifically. Corruption in this instance refers to the fact that money appears to define access to our politicians and to their influence. In the same way that *Code and Other Laws of Cyberspace*, his first book, gave me an understanding of how law and government regulation and control works within our Internet world of electronic commerce, 'Republic Lost' tells us how the framers of the Constitution attempted to protect us from the influences of bribery and of corrupt practices from the very beginning and goes to great length to show us how our legal system has continued to work to accomplish this, at least up until recently. Lessig's perspective exposed me to the realities of our subsidized market economy and he colored his discussions with a wonderful assortment of facts to show the 'unprecedented dependence' on absurd campaign funding of our elected officials that exists today. His quote of the chairman of Archer Daniels Midland, "the only place you will see a free market is in the speeches of politicians.
