NLN's Certified Nurse Educator Review: The Official National League For Nursing Guide

Synopsis

Written by expert researchers, educators, and professionals who collaboratively design standards and national certification exams for professional nurses, the CNE Review Book is the definitive guide for faculty pursuing the CNE credential. Based on the revised 2012 practice analysis, this book is an essential text for aspiring certified nurse educators and all nurse educators across the academic spectrum. Each of the book's chapters addresses one of the eight competencies required for the practice of academic nursing education. Special features include: • Sample test questions developed by the Certification Test Development Committee of the NLN Certification Commission • Extensive bibliography of the most current literature addressing each competency • How-to applications of content to the educator's practice.

Customer Reviews

I took the test yesterday and passed! This book was incredibly helpful...I passed by 9 and did a whole lot of studying! This test was much more difficulty than the NCLEX or CCRN! I used this book, went to a live review session, watched a review session by Billings on Nurse Tim, read the 2nd edition of the Whitmore book, and purchased both SAEs. I highly recommend this book!

This book is one of the the NLN's recommendation to study for the CNE exam certification. You cannot go wrong in adding this book to your study list! The book covers all topics necessary.

This book is the key to exam success. Perfect description of the test and many helpful hints. The review questions were very helpful.

I definitely wouldn't recommend this as your only study source. There is no comprehensive test and some of the end of chapter questions (in a CNE book of all places) are pretty bad (D. all of the above. Really??) The book is pretty small and the font could have been bigger. Pages of block text. The EBP and research highlights were useful. For such great authors, I was disappointed in the overall text. I bought this and borrowed the Wittman-Price and found that one more useful/easy to use. The Mometrix test bank wasn't useful for me, but it might be for you. Spring for the online NLN practice tests to focus your studying. Maybe get your department to buy them both, or share with a peer. Good luck. I passed today and it is a difficult exam. Can't wait for the ordered honor cord to arrive for the regalia!! (See the NLN site....)

Great book. I found the review book succinct and quite readable. I used this book along with Billing's Teaching in Nursing with great success - I passed the CNE!

I passed the CNE exam! I agree with others that there is not ONE book that will prepare you, but instead you will need to study from multiple sources. I primarily used Caputi's book, along with Billing's and Halstead's book. I also attended a live prep course and listened to Billing's webinar (multiple times). Give yourself plenty of time to prepare.

This book is dense, uninteresting, and visually unappealing. It reads like a disjointed thesis and isn't particularly useful as a study aid or as a reference book. Wittman-Price's CNE review manual is a much better option. Hopefully the NLN will work on improving this book in its second edition.

Having heard this author speak at a conference, I believe highly in her abilities to help educators certify as professionals in this field.
