## Customer Reviews

This is an interesting book about European Union'Politics , however we must carefully think about the two biggest problems concerning the European Union and Humanity, viz the Oncological problem and the Extreme Severe Nuclear Accident(s) problem.Unreasonably most Politicians, Administrators and their advisors are concerned with the "Daily business" and they avoid to think carefully and act efficiently and preventively on the Huge problems that European Union and Humanity confront before...it is too late!. ..Good ideas and information from citizens are misplaced and in extremely rare case(s) a good response is given in utilizing the originator of Idea(s) in order to develop further the idea(s) and to be motivated and supported for more useful contributions to European Union and to Humanity, therefore excellent unknown scientists and persons arede-motivated to offer their original knowledge and ideas. Think everything not random depends

on the "Human factor(Human decisions)" and the laws of nature and God. Therefore the biggest factor in the Prosperity of European Union and the Nations is its Most Qualified + Moral Citizens...A) Now, Let try to Think further in the Top problem of Oncology... I think further serious scientific Thinking and efforts must be allocated to the THEORY!
