OECD Communications Outlook 2009

Synopsis

The OECD Communications Outlook 2009 presents the most recent comparable data on the performance of the communication sector in OECD countries and on their policy frameworks. The data provided in this report map the eight years of competition for many OECD countries that fully opened their market to competition in 1998. The 2009 edition analyses the communications sector over the years following the "dot com bubble" crisis and explores future developments. The OECD Communications Outlook provides an extensive range of indicators for the development of different communications networks and compares performance indicators such as revenue, investment, employment and prices for service throughout the OECD area. These indicators are essential for industry and for regulators who use benchmarking to evaluate policy performance. This book is based on the data from the OECD Telecommunications Database 2009, which provides time series of telecommunications and economic indicators, such as network dimension, revenues, investment and employment for OECD countries from 1980 to 2007. For more information on trends in information technology, globalisation and the impact on the way people live and work, refer to the OECD Information Technology Outlook, published every other year.

Book Information

Paperback: 352 pages

Publisher: OECD Publishing (September 15, 2009)

Language: English

ISBN-10: 9264059830

ISBN-13: 978-9264059832

Product Dimensions: 7.5 x 0.8 x 10.6 inches

Shipping Weight: 1.6 pounds (View shipping rates and policies)
