## Customer Reviews

I wish I could give zero stars - no useful and I mean no useful information on knife making - this is signed to advertise another product by hoping you will click links. Even worse it is formatted by third grader so it is hard to read while also containing no information.

No useful information....at all...I also give it 0 stars!

This book is junk, wished I would have looked at the reviews before I purchased. Can't believe is letting it be sold on their site.
