Customer Reviews

In fall 1994, I flew from Cincinnati to Salt Lake City on one leg of a business trip return flight. The flight went farther north than expected, but toward the end it had to head SW toward Salt Lake. I had a window seat and realized I would be flying over the Wind River Mountains of Wyoming! I knew of them, but had never seen them before. I looked down and in a few minutes they appeared ... towering peaks, shining lakes, and glaciers. I knew then that I had to plan a backpack trip to

them. Later, upon looking at maps, I realized I had flown right over the high peaks portion of the Wind Rivers ... Gannett Peak, Fremont Peak, Titcomb Basin ... followed by Fremont Lake at the base of the range. When I got home, I looked for Wind River guidebooks and Joe Kelsey's "Climbing and Hiking in the Wind River Mountains, 2nd Edition" was the best. I immediately purchased it and started planning. I made three separate backpack trips to the Wind River Mountains with the help of the book. I have been in areas from Titcomb Basin in the north to Cirque of the Towers in the south. I am a scrambler (nothing over Class 3), but for the hiking part and the scrambling part, the book was excellent. When I saw that this 3rd edition was available, I purchased copies for myself and friends and can see that it is still the same excellent (and expanded/improved) guidebook. It reminds me that I need to get back to the Wind River Mountains again. Besides all the information, the photos (many with climbing routes shown) are beautiful. One thing that Mr.
